

Abstract

Title

The Project of Educational cycle trail in the protected landscape area in Broumovsko.

Objectives

The aim of this work is to create project of Educational cycle trail in rarely visited areas in the protected landscape area in Broumovsko. The main outcome of this work is a brochure which should be easily accesible in Toutist Information Centres in the area as well as on the Internet, where the tourist are allowed to download this file for free.

Method

The first part of this work analyzes accessible information found in printed and internet sources and gained thanks to dialogues with specialists working in PLA Broumovsko. Afterwards these gained information and facts were organized and used for selecting material for two educational cycle trail and also the path was defined.

In the second part I worked on the evaluation of these two paths in the form of questionnaire, which was distributed to those who rode their bikes along the educational cycle trails.

On the basis of dialogues with experts dealing with the protected landscape area, such as people working in the administration of the PLA and people engaged in travel tourism organizations in this PLA, I made an analysis of the current situation in the protected area and afterwards, analysis of a possible contribution of this work. Then two brochures, each with two possible options of track, were developed.

Results

The results of this work are a suggestion of two Educational cycle trail with their possible options in the protected landscape area Broumovsko. These two suggested tracks are adopt

into two information brochures that are ready to be used and which can be offered to tourists in the area through Tourist Information Centers and via Internet, on specific websites dealing with PLA Broumovsko.
